### EVENT OBJETIVE

With the participation of the operators

ANCAP

With the participation of government entities

# PRESENTATION

Exitep 2026 is the international exhibition for investors, operators, companies, and suppliers of hydrocarbon products and services. This exhibition will provide the most important companies in this sector from the invited countries with the ideal forum to present their latest projects, requirements, and technological innovations to potential clients and/or suppliers in the private sector.

Chevron, Saudiaramco, Qatar Petroleum, and Kuwait Oil Corporation will present technological innovations and seek domestic suppliers. YPF Argentina, Mendoza, and Neuquen will present investment projects in Vaca Muerta, Argentina, among other developments. ANCAP Uruguay will present its investment projects in offshore exploration and production.

Guyana Investment will present important investment projects for its country.

We bring together hydrocarbon buyers and decision-makers from both the domestic and international markets.

We have a new format so you can meet and greet your potential clients face-to-face, learn about their needs, and thus increase their business prospects.

# DON'T MISS THIS OPPORTUNITY!
